FACTORIES

4 plants in Italy

Our aim is to manufacture state-of-art refractories coupled with the best possible service; this means a continuous, demanding programme of improvements to meet rising expectations.

Linco Baxo production is located in Italy in four modern integrated plants which are able to produce large volumes of high-quality products at an affordable price.

Overall production of the group is in excess of 80,000 tons per year and the whole organization employs more than 150 people.

High quality materials, secured through its own Research and Development department, along with international qualifications, allow Linco Baxo to meet the highest standards of its domestic and foreign customers. Today Linco Baxo is a leading manufacturer of:

- Channel & Superstructure blocks for Working-ends and Forehearth
- Expendables for Feeder
- Feeder Expendables grade ASTM 23,26,28,30,32
- Refractory & Insulating Bottom blocks for furnace safety
- Alumina, Sillimanite, Zircon and Zircon-Mullite bricks and itemized shapes
- Special Blocks for hot-repairs
- Castables, ramming mixes, patches and mortars
- Ancillaries and auxiliaries

Since 1949, the year of its foundation, Linco Baxo group of companies has developed into a leading refractories manufacturer.

Thanks to the high quality standards of its own production program, the trade name Linco, Baxo, Kero, Maref and Sirma have achieved international recognition.

Resourcefulness, prime quality, service, reliability and safety have paved the way for today's standing of the group: a well renowned manufacturer of refractories.

Production and design engineers develop both standard products as well as tailored products according to customer specifications.

Technical staff is able to discern the developments taking place on the market and to verify and satisfy the needs of the customers.

The company invests considerably in research, development and training, as the general strategy is not only to meet current requirements, but also to anticipate future needs.

Company factories also include a complete modern central laboratory with all in-house equipment and a training centre.
